SUMMARY

A highly motivated and passionate individual stepping into the world of software engineering. Although I don't have professional experience yet, I have a strong foundation in coding, problem-solving, and software development principles. I'm eager to apply my skills in real-world projects, learn from industry experts, and grow into a well-rounded software engineer. My curiosity, adaptability, and commitment to continuous learning drive me to stay updated with the latest technologies and build meaningful, user-focused solutions.

EDUCATION

Bachelor of science in computer science
Kannur university

Sep 2022- march 2025

TECHNICAL SKILLS

- Testing & debugging codes
- Languages & Markup:
 - HTML5, CSS, JavaScript
- Frameworks & Libraries:
 - React.js, Bootstrap, Tailwind CSS
- Version Control & Tools:
 - Git, GitHub, npm
- Design & Layout:
 - Responsive Web Design, Flexbox, CSS Grid

SOFT SKILLS

- Problem-solving
 - Communication & collaboration
 - Time management
 - Fast learner
-

PROJECT

FacialBiometric Attendance System

- Developed a secure web-based application using facial recognition technology for student/staff attendance.
- Utilized Python with OpenCV and face recognition libraries for accurate face detection and verification.
- Designed a user-friendly website interface with responsive UI using HTML, CSS, JavaScript, and Bootstrap.
- Implemented a login and role-based dashboard (Admin, Staff, Student,parent) with access control.
- Created modules to register users, capture face images, and store attendance data in a database.
- Integrated live webcam feed for real-time face recognition and attendance marking.
- Application interface includes features like view attendance, manage users, notifications, and reports.
- Ensured secure data handling and basic authentication system for safe usage.
- Built for use in schools, colleges, or office environments to reduce manual work and avoid proxy attendance.

CERTIFICATIONS

- NPTEL-Programming in java
- NPTEL-Data structures
